And there's a simple and effective way to do it: houseplants. If your plants prefer higher moisture levels, you can spray the leaves using a spray bottle to provide this extra moisture. Many houseplants come from tropical or subtropical areas, so they do better with higher humidity levels that mimic conditions in the regions they come from. Beautiful photos and imaginiplaza campo santo de los mAAirtresAnimals Images & Images Photo Courtesy: Sara Monika/Image Source/Getty Images The COVID-19 pandemic has changed the way we live our daily lives, especially when it comes to how and where we spend most of our time. However, it prefers light shade and prefers to keep its soil moist (not soft) most of the time. Ventilation: Plants thrive when there is good circulation around them, but they don't like the heat exchange that happens when they are in ventilated areas. Pothos are quite resistant A"although they prefer a relatively high level and duration of sunlight, they can tolerate poorly lit areas. Ready to start? Although the plant, originally from Central America, does not have the holes found in a slice of Swiss, the wide leaves are punctuated by deep wedge-shaped slices that cause the leaves to expand. You can cut them out, put them in water until the roots sprout, and plant them in well-drained soil to expand your indoor garden.DracaenaThe striped leaves of this tropical plant add color and contrast almost everywhere in your home. Take a look at the seven best options for designing your own personal jungle.How to take care of and select the best plants for your homeOne of the interesting things about plants is have their own personality or at least their preferences. Even the center of each plant looks remarkably like a bird's nest. These green vases not only add color, character and cheer up your But they can also help to purify the air you breathe and can also reduce stress levels. or extremely dry conditions, à € ™ are tolerant more or less water than they prefer “€ À ™ remove it without (or with too much) for too long. Find out which type you prefer your future plants, and keep it at your fingertips when à € ™ time to report. Surprisingly, these tropical beauties can do well in the coldest climates, and, as they naturally grow on the forest floors, they prefer indirect filtered light. À € à € à € highly adaptable and tolerate almost everything you can launch, which forget the normal watercraft or not located in the brightest and most indirect sunlight that likes. Cultivation means: what your plants grow as important as the one they grow. Pictures kindly granted: home depot this type of dracaena is good in the middle of the bright À € à € à € but indirect À € à € à € à € à € à € à € à € à € à € à € αThe light, then à € ™ want to keep it away from windows and sliding glass doors on South and west sides of your home. These elements can make a big difference as well every plant does in your home. These climbing plants are delicate and elegant, with a beautiful won character and large leaves almost in the shape of a heart. They love moisture, and tend to thrive in the bathrooms where the steam provides the warmth and moisture they need. Snake Plant (Sansevieria Laurentii) This plant has solid rods of leaves that rise robustly from dirt. However, you can hang pure curtains to create softer and widespread light that Lemon Surprise loves.
